

# Delaware County CODE COMPLIANCE

A Department of the Environmental Services Division

Building Regulations **Floodplain Regulations** Zoning Regulations

## FLOOD HAZARD AREA DEVELOPMENT PERMIT APPLICATION

Application is hereby made for a DEVELOPMENT PERMIT as required by the Flood Damage Prevention Regulations resolution No. 390146 of *Delaware County* for development in an identified flood hazard area (FHA). All activities shall be completed in accordance with the requirements of said regulations. The development to be performed is described below and in attachments hereto. The applicant understands and agrees that:

- The permit applied for, if granted, is issued on the representations made herein;
- Any permit issued may be revoked because of any breach of representation;
- Once a permit is revoked all work shall cease until the permit is reissued or a new permit is issued;
- Any permit issued on this application will not grant any right or privilege to erect any structure or use any premises described for any purposes or in any manner prohibited by the ordinances, codes, or regulations of the municipality;
- The applicant hereby gives consent to the Floodplain Administrator to enter and inspect activity covered under the provisions of the floodplain regulations;
- If issued, the permit will expire if no work is commenced within one year of issuance.

Owner's Name: \_\_\_\_\_ Builder/Developer: \_\_\_\_\_

Address: \_\_\_\_\_ Address: \_\_\_\_\_

Phone: \_\_\_\_\_ Phone: \_\_\_\_\_

### LOCATION OF DEVELOPMENT SITE

1. Location of proposed development (site address): \_\_\_\_\_
2. Legal description: \_\_\_\_\_

*Attach a location map showing the location of the development site relative to adjacent sites. A location map may be a copy of the tax or plat map, including scale, showing the parcel where development activity will occur.*

### DESCRIPTION OF WORK

3a. Kind of development proposed (check all that apply):

- |  |  |
|--|--|
| <input type="checkbox"/> Residential structure   | <input type="checkbox"/> Non-residential structure                 |
| <input type="checkbox"/> New structure   | <input type="checkbox"/> New structure                             |
| <input type="checkbox"/> Addition to structure   | <input type="checkbox"/> Addition to structure                     |
| <input type="checkbox"/> Renovations/repairs/maintenance   | <input type="checkbox"/> Renovations/repairs/maintenance           |
| <input type="checkbox"/> Manufactured home installation  |  |
| <input type="checkbox"/> Accessory structure: Dimensions: _____  |  |
| <input type="checkbox"/> Filling or grading  | <input type="checkbox"/> Dredging or excavation or mining          |
| <input type="checkbox"/> Materials/equipment storage: Describe type _____                                  |  |
| <input type="checkbox"/> Watercourse alteration (any change that occurs within the banks of a watercourse) |  |
| <input type="checkbox"/> Water supply / sewage disposal  | <input type="checkbox"/> Bridge or culvert placement / replacement |
| <input type="checkbox"/> Subdivision greater than 50 lots or 5 acres                                       | <input type="checkbox"/> Other development greater than 5 acres    |
| <input type="checkbox"/> Other: _____  |  |

Additional activity description: \_\_\_\_\_

3b. If the proposed construction is an addition, renovation, repair or maintenance to an existing structure, indicate the cost of proposed construction \$ \_\_\_\_\_. What is the estimated market value of the existing structure \$ \_\_\_\_\_?

NOTES AND ADDITIONAL SUBMITTAL REQUIREMENTS:

- In addition to completion of this form the applicant agrees to submit any additional information required by the floodplain administrator in order to determine that the proposed development is compliant with the local and federal flood damage prevention criteria of the National Flood Insurance Program. Site plans for all development proposals must:
  - Be drawn to scale with north arrow.
  - Show property boundaries, floodway, and floodplain lines.
  - Show dimensions of the lot.
  - Show dimensions and location of existing and/or proposed development on the site.
  - Show areas to be cut and filled.
- Applications for residential and non-residential structures must also include:
  - The proposed lowest floor elevation based on the datum used on the effective Flood Insurance Rate Map and base flood elevation for the site.
  - Identification of whether the structure has a basement or enclosure below the lowest floor, and if it contains a basement or enclosure, detailed drawings showing foundation openings to allow passage of floodwaters.
  - Description of how building utilities will be protected from flood waters including drawings showing locations of such utilities.
  - Detailed description of anchoring system for all mobile and manufactured homes.
  - Description of construction materials that will be used below the flood protection elevation.
- An existing structure must comply with the flood protection standards if it is substantially improved (an improvement equal to or greater than 50% of the market value of the structure). The "substantial improvement" definition applies to existing structures only and that once a structure meets the definition of "new construction" any further improvements to that structure must meet "new construction" requirements. For floodplain management purposes "new construction" means structures for which "start of construction" began on or after the effective date of the initial Flood Insurance Rate Map issued by FEMA for the community.
- Any Pre-FIRM structure within the FHA that has sustained damage from any source (flood, fire, etc...) must be evaluated to determine if the structure is "substantially damaged" (damaged to 50% or more of the market value of the structure). If the structure is "substantially damaged, the structure must be brought into compliance with the flood protection standards.
- For subdivision proposals greater than 5 acres or 50 lots, or large-scale developments greater than 5 acres, a hydrologic and hydraulic analysis must be conducted to determine base flood elevations in flood hazard areas where no base flood elevations are provided.
- A Conditional Letter of Map Revision (CLOMR) must be obtained for proposed projects that would result in more than a 1.0 foot increase in base flood elevation (BFE) on a watercourse that has been studied through detailed hydrologic and hydraulic analyses where BFEs have been specified, but no floodway has been designated or when a project proposed (totally or partially within the floodway) along a watercourse for which detailed analyses have been conducted and BFEs and a floodway have been designated would result in any (greater than 0.0 foot) increase in the BFE.
- Applications for non-residential structures proposed to be floodproofed must have a completed FEMA floodproofing certification form attached (can only be completed by a Registered Professional Engineer or Architect).
- All development proposals determined to be located in a floodway must be accompanied by a hydrologic and hydraulic analysis showing impacts of the development on flood heights (can only be completed by a Registered Professional Engineer).
- Development proposals that are considered alterations of a watercourse must be accompanied by an analysis showing that the flood carrying capacity of the watercourse has not been reduced. (can only be completed by a Registered Professional Engineer).

**I AGREE THAT ALL STATEMENTS IN AND ATTACHMENTS TO THIS APPLICATION ARE A TRUE DESCRIPTION OF THE EXISTING PROPERTY AND THE PROPOSED DEVELOPMENT ACTIVITY. I UNDERSTAND THE DEVELOPMENT REQUIREMENTS FOR SPECIAL FLOOD HAZARD AREA ACTIVITIES PER THE APPROPRIATE ORDINANCE OR RESOLUTION AND AGREE TO ABIDE THERETO. I UNDERSTAND IT IS MY RESPONSIBILITY TO OBTAIN ALL OTHER APPLICABLE FEDERAL, STATE AND LOCAL PERMITS.**
